PROTECTING WHAT MATTERS

I've always been passionate about supporting the American economy and preserving our industrial infrastructure. My philosophy is that if my neighbor doesn't have a job, sooner or later I probably won't have a job either. At WeatherTech, we design, engineer and manufacture right here in America, so you can trust that we're using the best materials, leveraging leading edge technologies and innovations, and hiring skilled and educated workers to create world-class products.

By creating our products here in the U.S., we also have better line of sight to initiatives that are just as important to me as job creation — human and animal rights, safe workplace practices, environmental responsibility and more.

Now more than ever, we need to support each other in getting our economy up and running again. That's why WeatherTech is an American business that supports other American businesses like yours. It's our responsibility to work together to help each other succeed, and help our country recover. American-made goods and services directly support the U.S. economy and, in turn, our broader partners of 330 million Americans.

Life is simple; be good to your fellow man, be kind to animals, respect our environment, and put building a quality product and supporting American workers before making profits. We take pride in knowing that WeatherTech will always help lead the way.

Sincerely,

David MacNeil, WeatherTech Founder and CEO
